Product Designer with 14 years of experience in fintech and banking, spanning Hong Kong and London. I've led design across trading platforms, virtual banking, and investment products, working at both IC and leadership level. My recent work includes an AI-enabled production tool, a full app revamp, and a negative balance protection feature at Capital.com. I design with research and data, and I'm comfortable owning complex problems end-to-end, from discovery through to delivery.

AREAS OF EXPERTISE

Financial product design Fintech & regulated UX Design systems
Cross-functional leadership User research & testing Design operations AI integration
Mobile app design Interaction design Stakeholder communication

WORK EXPERIENCE

Senior Product designer | Capital.com

May 2024 - Present Full-time, London UK

- Led the end-to-end redesign of the Capital.com mobile app, unifying CFD trading, options, and 1x investing into a single experience for 3 million users.
- Designed the negative balance protection feature in collaboration with compliance and risk teams, meeting FCA regulatory requirements while maintaining a clear user experience.
- Built a custom GPT to automate banner graphic production across four regulatory jurisdictions (FCA, CySEC, MAS, ASIC), reducing production time by 88% and achieving an 85% first-pass compliance approval rate.

Key Projects :

Capital.com app revamp Negative Balance protection AI-enabled banner production tool

UX Manager | Livi Bank Limited

JUN 2020 - May 2023 Full-time, Hong Kong

- Managed a team of three designers as the sole UX Manager, leading end-to-end design across multiple financial products including fund investment, BNPL, and savings features.
- Revamped and maintained the design system, building 100+ components with engineering-ready documentation.
- Led the end-to-end process of livi Invest, a Chat-based fund investment product for first-time investors.
- Shipped livi PayLater, Hong Kong's first automated BNPL product.

Key Projects :

livi Invest livi PayLater (BNPL) App revamp (migration to lokalise)
